## MAKS GTC RTU

### GAS TURBINE CLEANER

#### GENERAL DESCRIPTION

**MAKS GTC RTU** is a concentrated neutral cleaning fluid for cleaning and corrosion inhibiting of gas turbine compressors. Furthermore, it is non-hazardous, water-based, non-corrosive, non-toxic, non-flammable and biodegradable Gas Turbine Compressor cleaner.

#### PRINCIPLE USES

**MAKS GTC RTU** is a special designed for on-line (hot wash) and off-line (cold wash) cleaning of gas turbine compressors. On-line cleaning of gas turbine compressors is known to provide the most effective method for preventing gas turbine fouling.

#### PRODUCT BENEFITS

- Ensures maximum available power output
- Better fuel efficiency
- Reducing costly downtime and production losses
- Has inherent corrosion inhibiting properties which are compatible with aluminum, magnesium, nickel-cadmium, stainless steel and titanium.

#### DOSAGE

**MAKS GTC RTU** is ready to use product, do not dilute before use. Potable water may be used for off-line / Crank Wash.

Your **BİMAKS** representative will recommend the optimum dosage necessary to ensure maximum program performance according to your specific system parameters.

#### FEEDING

For On-line / Hot Wash **MAKS GTC RTU** is injected into the compressor via spray ring or lance while the gas turbine is operating. Off-line / Crank Wash is performed while the gas turbine is in a cooled state utilizing cranking speed.

#### HANDLING-STORAGE-SHIPPING

As a standard precaution with all chemicals we recommend the use of protective equipment such as goggles and rubber gloves when handling. Consult the Material Safety Data Sheet as the only official source of Environmental and Safety information.

**MAKS GTC RTU** can be stored for at least 5 years from date of shipping if kept in its original, unopened container and under normal warehouse conditions. Protect from freezing and from exposure to high temperature.

**MAKS GTC RTU** is available in non-returnable containers of different sizes.
