

PRODUCT BULLETIN

MAKS 8070

ANTISCALANT

GENERAL DESCRIPTION

MAKS 8070 is a liquid antiscalant specially formulated for mining industry (gold, silver, copper, etc)

PRODUCT BENEFITS

- Effective silica antifoulant.
- Online cleaner.
- Especially formulated to use in leaching pools with high pH values.
- Prevents deposit of soluble hardness salts, ferrous or other minerals
- Prevents scale formation so provides effective run of pumps, pipelines, nozzles.
- Provides scale inhibition when using in grinding process.
- Resistant to high temperature so can be applied to elution cycle.
- Reinforced formulation
- No performance loss during storage

DOSAGE & FEEDING

The highest protection is achieved by applying to the first point of the where the water is fed or to the suction of circulation pump. The product can be fed neat or diluted via a dosing pump.

The dosage rate is proportional to the amount of iron, hardness, silica and other minerals in the system.

Your **BIMAKS** representative will recommend the optimum dosage necessary to ensure maximum program performance according to your specific system parameters.

MATERIALS: Storage and application equipments (pumps, tanks, lines) should be corrosion resistance materials as PE, stainless steel, fiberglass, ceramic, lead or rubber.

HANDLING-STORAGE-SHIPPING

As a standard precaution with all chemicals we recommend the use of personal protective equipments such as goggles and rubber gloves when handling. Consult the Material Safety Data Sheet as the only official source of Environmental and Safety information.

MAKS 8070 can be stored for at least 24 months from date of shipping if kept in its original, unopened container and under normal warehouse conditions. Protect from freezing and from exposure to high temperature.

MAKS 8070 is available in non-returnable containers of different sizes.
